Yeonwoo Jeong

Seoul, S. Korea & Irvine, CA | (+1)-949-414-9449 | willijeong1@gmail.com | LinkedIn | ORCID

With an academic background of psychology, medicine, and neuroscience across S. Korea and the U.S., I aspire to become a warm-hearted neuropsychiatrist as well as develop a research career in biological psychiatry. My long-term research goal is to further refine our conceptualization of mental illness, intertwining pioneering discoveries in psychoneuroimmunology with a profound understanding of the human mind achievable through clinical expertise.

Education and Training

03/2021 - 02/2028 Doctor of Medicine & B.A. in Psychology, Seoul National University, Seoul, South Korea

Microdegree in Neurophysiology (Continuing Research Program)

- Hakgye Merit Scholarship (full tuition), from Spring 2024.
- Premedical Course Dean's List (GPA 3.91/4.00)

03/2018 - 02/2021 High School Diploma, Korean Minjok Leadership Academy (KMLA), Hoengseong, South Korea

- Exemplary Student Award, Feb 2021.
- Yeongjae Merit Scholarship (partial tuition), from Fall 2018.

Professional Experiences

11/2024 - Present Research Collaborator, Cultural & Developmental Psychology Laboratory

Department of Psychology, Scripps College (PI: Heejung Park)

- Researched on positive youth development in adolescents from diverse backgrounds.
- Researched on meaning-making and resilience in traumatized communities.

12/2021 – 02/2025 Student Research Assistant, Laboratory of Neurological Disease

Department of Biomedical Sciences, Seoul National University (PI: Seung-Jae Lee)

- Researched on TLR2 as the mediator of $\alpha\mbox{-synuclein}$ propagation in synucleinopathies.
- Researched on oligodendrogliopathy induced by transmission of neuron-released α-synuclein.
- SNU Physician-Scientist Training Undergraduate Research Scholarship (\$1,200), Oct 2024.
- Health Fellowship Foundation Research Scholarship (\$5,000), Aug 2024.

Clinical Experiences

03/2025 Clinical Observer, AHA Comprehensive Hypertension Center, UC Irvine Health

Publications

* indicates equal contribution

Bae EJ*, Ham S*, **Jeong Y**, Yang WS, Shin J, Lee WJ, Ahn WJ, Yoon YS, Lee HJ, Park SH, Lee SJ. Anti-TLR2 immunotherapy modulates neuron-to-oligodendrocyte propagation of α-synuclein. *Nature Communications*. Submitted.

Conference Presentations

* indicates equal contribution

Jeong Y, Bae EJ, Ham S, Yang WS, Park SH, Lee SJ. Toll-like receptor 2 mediates oligodendrogliopathy in alphasynucleinopathies. Oral session presented at: 39th Annual Convention of the Seoul National University College of Medicine Alumni Association of North America; 2025 Apr 10–13; Falls Church, VA.

- Bae EJ*, Ham S*, **Jeong Y**, Yang WS, Shin J, Lee WJ, Ahn WJ, Yoon YS, Lee HJ, Lee SJ. Neuron-to-oligodendrocyte alpha-synuclein transmission in multiple system atrophy is mediated by Toll-like receptor 2. Poster session presented at: 1st Seoul National University Physician-Scientist Training Program Workshop; 2024 Dec 5–6; Incheon, South Korea.
- Jeong Y, Bae EJ, Lee SJ. Expression of neural phenotype in alpha-synuclein-exposed human oligodendrocytes. Oral session presented at: Alpha-synuclein inclusion may provoke neuron-oriented transdifferentiation in human oligodendrocytes. 2022 Seoul National University Premedical Course Research Festival; 2022 Dec 16; Seoul, South Korea.

Honors and Awards

- 04/2025 Travel Award for the 39th SNUCMAA Convention (\$1,500) for Jeong et al.
- 12/2022 Premedical Student Research Award (best presentation, \$1,000) for Jeong et al.
- 06/2021 Volunteer Social Service Award, Seoul National University
- 12/2020 Talent Award of Korea, Deputy Prime Minister and Minister of Education of the Republic of Korea
 - National honor awarded to 50 high school students with outstanding achievements, \$2,000 scholarship
- 01/2020 Korean Chemistry Olympiad Finalist: Certificate of Merit, Korean Chemical Society
- 08/2019 Korean Biology Olympiad Finalist: Future Biologist Award, The Korean Society of Biology Education
